

Chayan Ghosh

FULL-STACK DEVELOPER | MERN STACK | TECHNOLOGY & PROJECT MANAGEMENT

Kolkata, West Bengal | Chayanghosh2005@gmail.com | [Linkdin](#) | [Portfolio](#)

Computer Applications student with hands-on experience in Web development, AI/technology projects, and event management. Skilled in coordinating teams, managing projects. Experienced in organizing college level events and collaborating across teams, with a strong interest in AI, software engineering, and emerging technologies. A proactive and adaptable individual seeking opportunities to apply technical and leadership skills in real-world environments.

KEY ACHIEVEMENTS

- Built MERN-stack applications for a real-world problems.
- Led and coordinated college-level events and cross-functional teams.
- Managed event planning and execution, ensuring smooth coordination across teams and activities.

TECHNICAL EXPERIENCE

- **Languages:** Python, JavaScript, HTML5, CSS3, SQL
- **Frontend:** React.js, HTML5, CSS3, Responsive Web Design
- **Backend:** Node.js, Express.js, REST APIs
- **Database:** MongoDB, MySQL
- **Development:** MERN Stack, Full-Stack Development, API Integration, CRUD Operations
- **Tools & Platforms:** Git, GitHub, VS Code, npm, Vercel
- **Other:** Problem Solving, Debugging, Team Leadership, Project Coordination

PROFESSIONAL EXPERIENCE

FULL STACK DEVELOPMENT USING MERN

ESC (Internship | Training | Project)

30th August,2025 – 24th October, 2025

- Developed and enhanced web application features using MongoDB, Express.js, React.js and Node.js.
- Built responsive frontend components using React.js, HTML5 and CSS3.
- Developed backend functionality and integrated REST APIs for application features.
- Worked with MongoDB for database operations and CRUD functionality.
- Used Git and GitHub for version control and collaborative development.
- Debugged application issues and contributed to improving functionality and user experience.

PROJECTS

KisanBharosa — Agricultural Supply Chain Platform

React.js | Node.js | Express.js | MongoDB

- Developed a digital marketplace designed to connect farmers directly with consumers, reducing dependency on intermediaries.
- Enabled farmers to list and sell agricultural produce directly through a centralized platform.
- Designed the application to improve accessibility and transparency within the agricultural supply chain.
- Implemented a user-focused interface for discovering and purchasing agricultural products.

EpicFrame — Event Management & Ticketing System

React.js | Node.js | Express.js | MongoDB

- Developed an event management platform allowing organizers to create and manage events digitally.
- Implemented functionality for organizers to monitor audience registrations and participation.
- Developed a ticketing workflow allowing attendees to register for events and use tickets for entry.
- Designed a centralized system to simplify event and audience management.

Weather Report — Weather Information Application

JavaScript | REST API | HTML5 | CSS3

- Developed a responsive weather application allowing users to search weather information by location.
- Integrated a weather API to retrieve and dynamically display weather information.
- Designed a simple and user-friendly interface for presenting weather data.

EDUCATION

Bachelor of Computer Applications (BCA)

Meghnad Saha Institute of Technology - Kolkata, West Bengal

2023-2027

Higher Secondary (Class XII)

Meghmala Roy Educatio Centre - Kolkata, West Bengal

2023 - passout
